

DPOBOARD SERVICE · READINESS ASSESSMENT

AI Governance Readiness Assessment

*A focused engagement to find out where your AI systems, data flows,
and function-level obligations actually stand today.*

BUILT FOR

Multinational Enterprises

Multi-Department Organizations

General Counsel & CPOs

CISOs & IT Leadership

If your organization is deploying AI across more than one department — HR, Marketing, IT, Engineering, or others — and you don't yet have a single, current picture of your exposure, this assessment is the fastest way to get one.

WHAT'S INCLUDED

A clear, function-by-function picture of your AI and privacy risk — in weeks, not quarters.

Cross-functional AI & data inventory

A working map of where AI systems and sensitive data actually live across your departments and regions.

Function-level risk scoring

Each department scored against its actual exposure — not a generic, org-wide checklist.

Regulatory obligations map

Applicable privacy and AI regulation mapped to your specific jurisdictions and use cases.

Prioritized findings report

A concise executive report ranking gaps by urgency, with a recommended next-step roadmap.

HOW IT WORKS

01

Kickoff

Scope confirmed with your team

02

Discovery

Inventory & stakeholder interviews

03

Analysis

Risk scoring & obligations mapping

04

Readout

Findings & roadmap presented

Ready to see where you stand?
